

# SheathLess *pV*

*Peri-Vascular Guiding System*

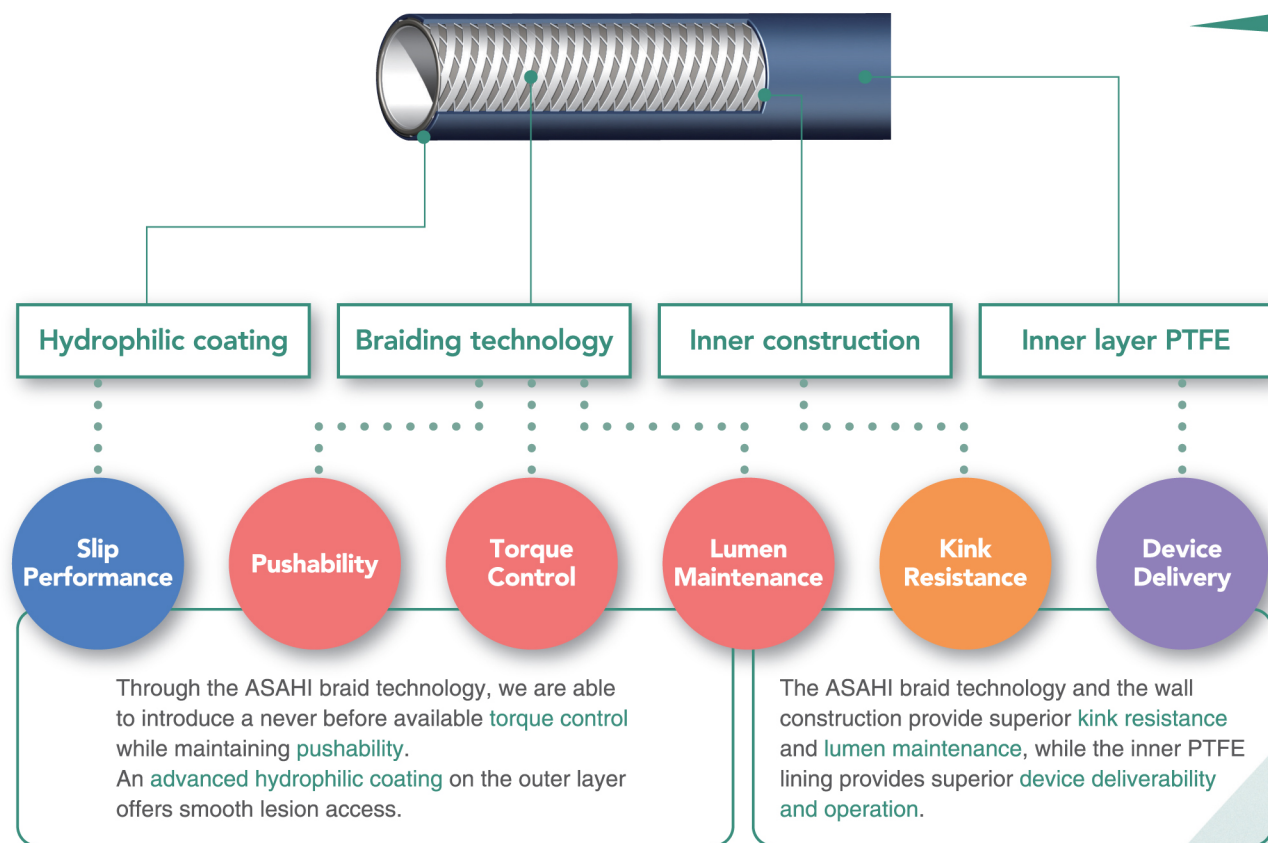

# The ideal environment fo

## Everything desired in a guiding catheter

Trackability and lumen maintenance are two of the most important features of a peripheral intervention guide catheter, allowing you to advance the guide catheter to the lesion site and deliver the therapeutic device even through tortuous vessels.

## Closer to perfection for device delivery

We developed the SheathLessPV with the aim of creating a guide catheter system you can trust to accommodate any treatment strategy for your peripheral interventions. With strong performance features and an abundance of variations, SheathLessPV can be used with various approaches and vessel types.

**PCI technology in the PPI field!**

# r device delivery.

## Easier Cross-over Approach

- ✓ **Hydrophilic coating on the outer shaft**  
Makes a smooth approach possible even in tortuous vessels.
- ✓ **Special Braid Construction for Guide Catheters**  
Provides support for precise device delivery even through tortuous vessels.
