

Milan June 30<sup>th</sup>, 2021

## **Acquisition of Kardia by Asahi Intecc**

We are happy to announce that from July 1<sup>st</sup> 2021, Kardia will be part of the Asahi Intecc. Group, a Japanese company leader in the development and production of top notch medical devices.

After 25 years of mutual and successful cooperation with Asahi Intecc., a cooperation that has allowed Kardia to be widely prized in the interventional Cardiology, interventional radiology, interventional neuroradiology and vascular surgery labs, becoming an Asahi Intecc. Group Company means for all of us a valuable achievement.

This operation allows establishing a clear long-term vision not only for the devices of the Asahi lineup, but also for all the devices currently in our portfolio, and for the cathlab that we support via the Service business.

We are honored to be now part of the Asahi Intecc. Group, and we trust that from now we will be able to better face the challenges of a market that is becoming everyday more competitive.

Kardia will not change his legal corporate entity (means it remains an S.r.l. meaning a limited liability company) and the contact persons will remain the same.

All administrative data and commercial data stay the same.

We are at your disposal for any question or comments.

**Kardia S.r.l.**
